# Digital Services Development Engineer Department of Advanced Software Engineering (A.S.E.D.S)

## Objectives

The Digital Services Development Engineer designs and develops application and software solutions, from the planning phase to the development phase, using the appropriate language for the benefit of a customer or a company according to functional needs and specifications.

With strong IT development skills, they also master concepts and knowledge of technological environments that allow them to participate in their definition and structuring (databases, servers, etc.). In order to formalize the appropriate documentation (user guide, etc.), they can, in addition, be in charge of the maintenance and evolution of the product.
