[Internships & recruitment offers](#) [2]

The INPT training program requires students to integrate partner companies. With this said, engineering students are required to:

- A worker internship in the 1st year,
- A technical internship in the 2nd year,
- The end-of-studies project in the 3rd year.

Internship management

The worker internship (4 to 8 weeks) in the first year, aims to:

- Understand the overall functioning of a company and its environment;

The technical internship (4 to 8 weeks) in the second year, aims to:

- Put into practice the knowledge acquired during the INE cycle curriculum;
- Acquire skills to respond to a technical problematic which must be carried out under the supervision of a tutor;

The end-of-studies project (4 months) in the 3rd year, aims to:

- Capitalize the knowledge acquired during the engineering cycle;
- Write a thesis, present it and clearly explain achieved results in front of a jury.

Laureates' recruitment

The INPT laureates are often recruited by partner companies who have had various career opportunities since the end-of-studies project. Note that the majority of job offers were from IT service companies, manufacturers, telecom operators, banks and many others.

The internship management and end-of-studies projects' supervision is done under the Internships and Business Relations Direction.

DASRE Team:

HILALI Abdelaziz

Deputy Director of Internships and business relations
