

DATA research team

Main topics

- Social Media as Sources of New Customers Insight
- Anticipatory systems based on AI and Analytics
- AI and Analytics applied to Market intelligence
- AI and Analytics applied to Knowledge management
- Building Intelligent Supply Chains with AI and Analytics
- Operation research and optimization for industry 4.0
- Business Transformation Challenges in the era of Blockchain

Applicants should have an advanced level of English. TOEIC and / or TOEFL tests are strongly recommended. The selected doctoral students will be involved in the activities of the DATA research team (IEEE ICTMOD biannual conference, workshop, response to calls for research projects), and they should demonstrate more availability.
